Female Hormone Clinic

A national service for women who suffer from serious mental health disorders, including psychosis and severe depression, at times of hormonal change (e.g. premenstrual, peri and post-menopausal).
Overview

Our NHS outpatient service, at the Maudsley Hospital, provides assessment and evidence-based treatments for women who suffer from serious mental health conditions, including psychosis and severe depression, at times of hormonal change (for example, pre menstrual, peri and post-menopausal).

Interventions

- Diagnostic assessment
- Pharmacological treatments (hormonal and non-hormonal)
- Psychological treatments, including CBT

Outcomes

- Recommendations for treatment
- Reduction in symptoms
- Improved daily functioning and quality of life

Referrals

We welcome referrals from consultant psychiatrists based across the United Kingdom. Referrals can be made to Dr Michael Craig - PhD FRCOG FRCPsych, online, or by using the contact details below.
